families
what computes them
topology
70 descriptors
the footprint
placement
31 descriptors
where the receptor sits
kinetics
17 descriptors
the interface as springs
interface
26 descriptors
how much contact, of what kind
potts
5 descriptors
energy against the partition function
energetics
15 descriptors
referenced interface energy
invariance
what they mean
topological
14 descriptors
preserved by homeomorphism
Betti numbers, b0 - b1
geometric
65 descriptors
preserved by isometry
a length, area, angle or cosine
compositional
64 descriptors
a count over the labelled
contact set, or a share of one
categorical
1 descriptor
which class of MHC
presents the peptide
energetic
20 descriptors
a statistical-potential
or Potts energy
