S atomic coordinates
~10^4 atoms
fix a frame
threshold distances
rasterise both faces
F groove frame
u, w, n from the groove-floor SVD
placement
C contact set
pairs within 5 A, heavy atom
H height fields
two rasters, one grid
topology
attach stiffness
keep the metric
attach identity
forget distances
Σ spring / Potts network
contacts with geometry, multiplicity
kinetics
D distance maps
Ca and Cb, region by region
topology
L labelled contacts
contact + identity or bond type
interface, energetics, potts
B biadjacency matrix
which residue touched which
topology
forget incidence
T cell tally
counts per cell of a fixed partition
topology
